NOVEMBER 2016

NICHOLAS M. HELLMUTH

I am aptly called
**HAND
OF THE
DEVIL**

My local name is spelled
Canac or Canak.
I am also called manitas.

My leaves are used to wrap
(and flavor).
But only in villages near volcanoes
or comparable high mountains.

I can be found most easily on mountains north of Lake Atitlán, on the slopes of the volcano Tacaná near Sibinal, San Marcos, and on the slopes of

**Volcan
Acatenango.**
