

What **EXPLOSIVE**
seed pod is this?

I am a *Hura polyandra* tree.

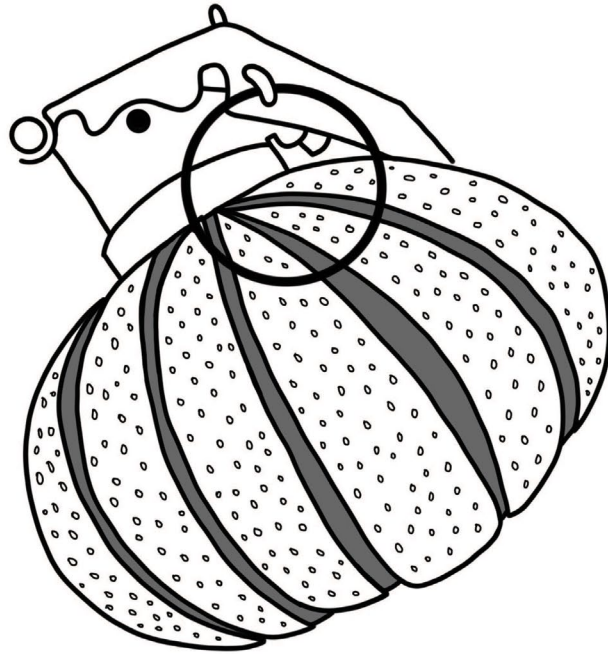

Locally I am named Arbol del Diablo
(in Oaxaca, Mexico) and Habillo.
In the Yucatec Maya language I am
called Solimán che' or Zolimanche.

I have the most remarkable
seed pod chemistry
and engineering structure.

Exploding Seed Pod

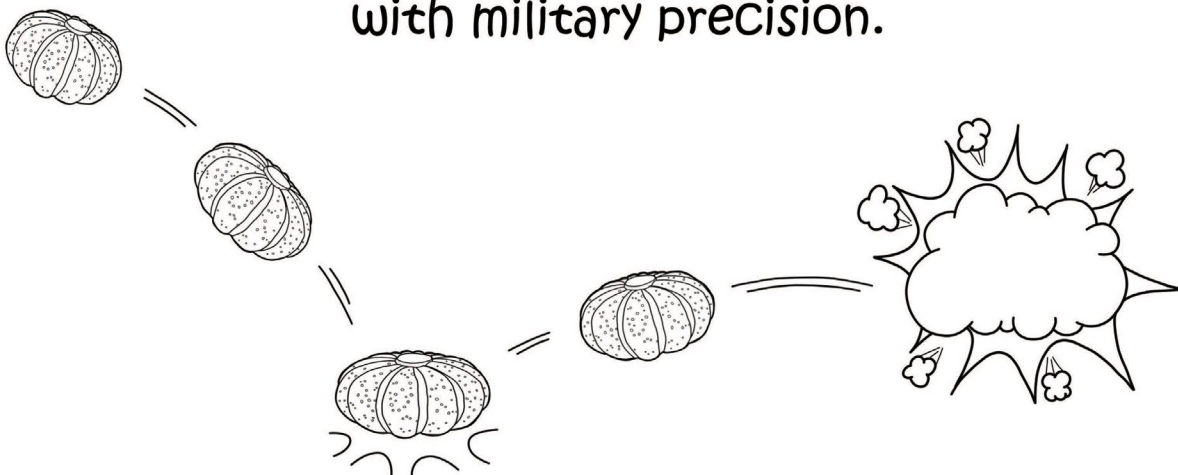

Which explodes like
a hand grenade

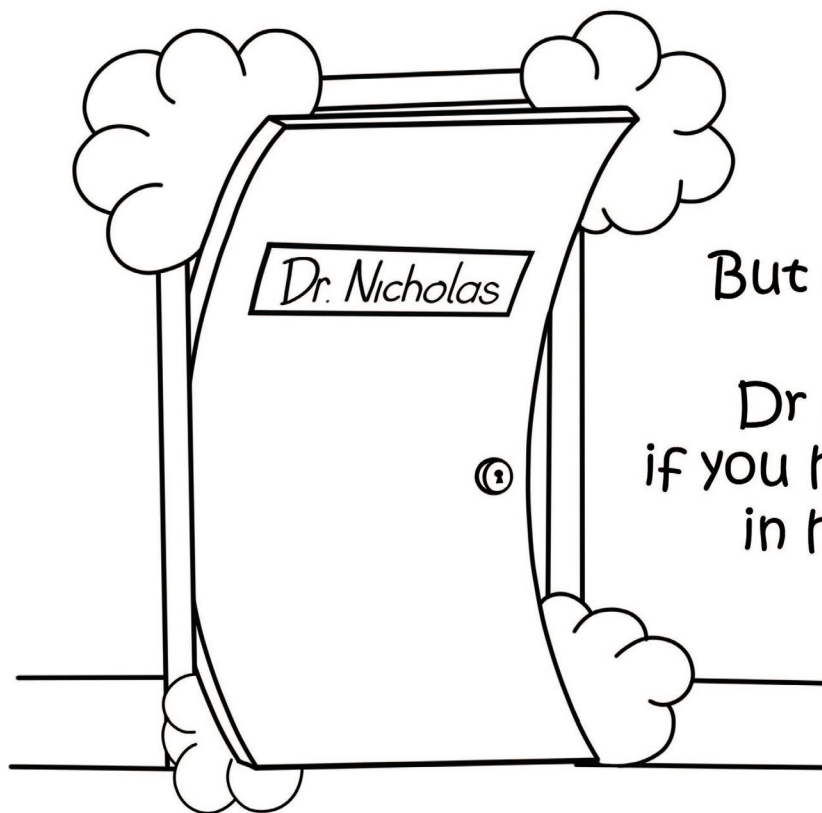

2

I would like to show you
what Mother Nature has evolved
in my DNA.

To allow me to explode my seed pot
with military precision.

10

But don't be surprised
when visiting
Dr Nicholas's office,
if you hear things exploding
in his research area.
