

The  
**ANTS**  
are  
EVERYWHERE

Storyboard Dr. Nicholas Hellmuth  
Illustrations Lucia Brolo

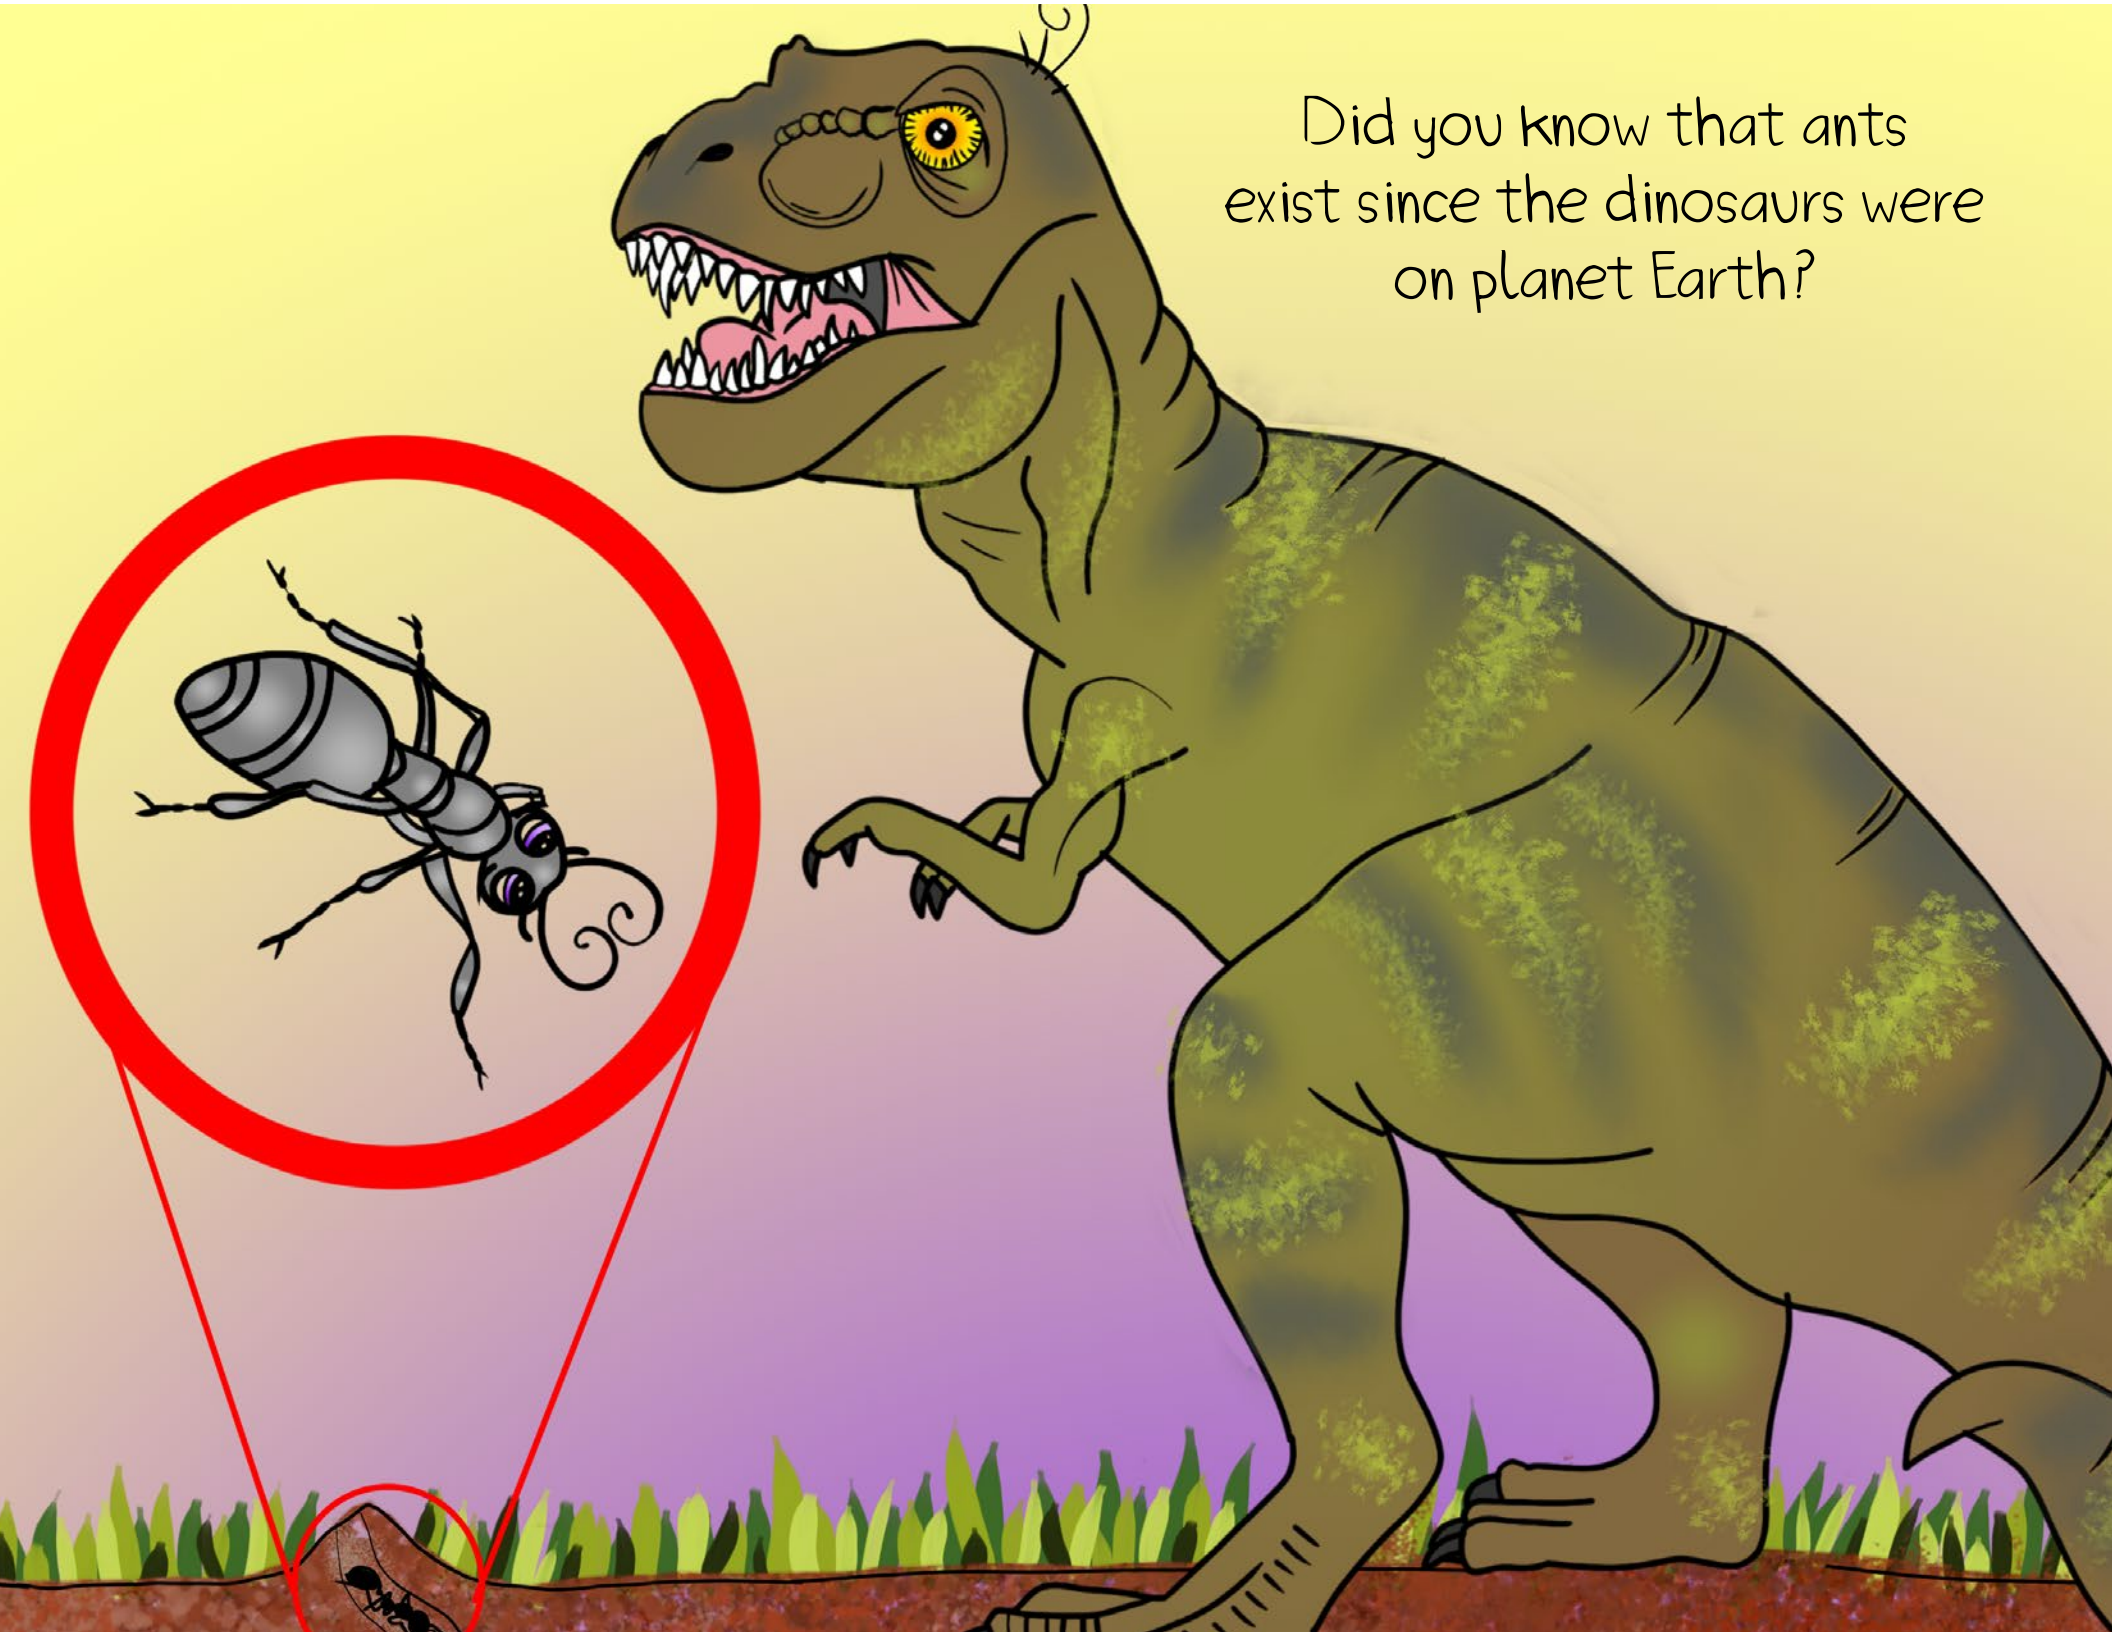

There are more than 100 species of ants in Guatemala.

Did you know that ants  
exist since the dinosaurs were  
on planet Earth?

But do not leave food for long, because  
when you are not there we can eat it  
without your permission.

Leaf cutting ants raise fungus on the leaves and flowers that they bring into their nests.

MayanToons are produced by the 100% Guatemalan team of FLAAR Mesoamerica, coordinated by FLAAR (USA).
